

Math Review Resources

Note: All of these resources are **optional** for you to enhance your understanding of the material covered in class.

Practical examples of derivatives

Visit [this playlist](#). Lecture 11 and beyond will work out the derivatives step by step.

Concepts and formalism on multivariate calculus and probability

Visit [this book](#). Chapter 5 and Chapter 6.

Deep dive into probability

Visit [this playlist](#). Note – these are long videos.

Videos most useful for our course:

- Probability and Statistics: Overview
- Set Theory in Probability: Sample Spaces and Events
- Conditional Probabilities
- Bayes' Theorem (with Example!)
